

AARON NOVAK PRESENTATION T1

Hello all and welcome to my presentation.

I am going to show you my site and how, and why i designed it the way I did.

But before that

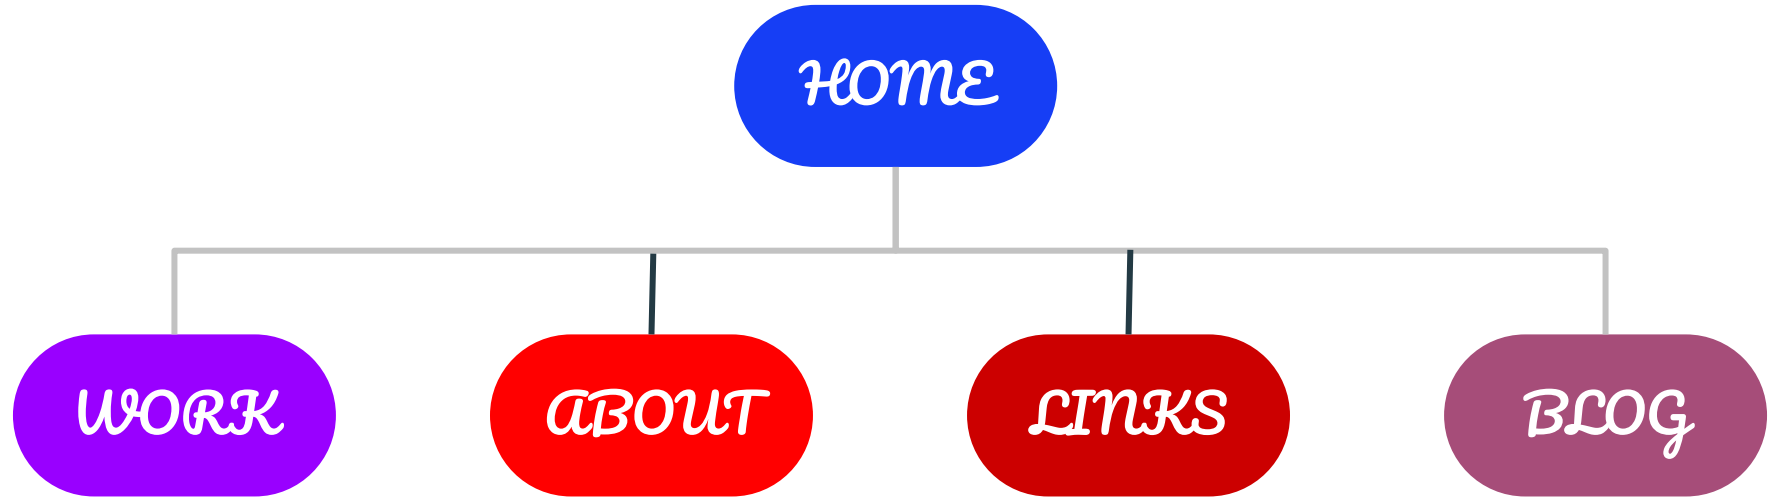

1 potatoe, 2 potatoe, 3 potatoe

Questions

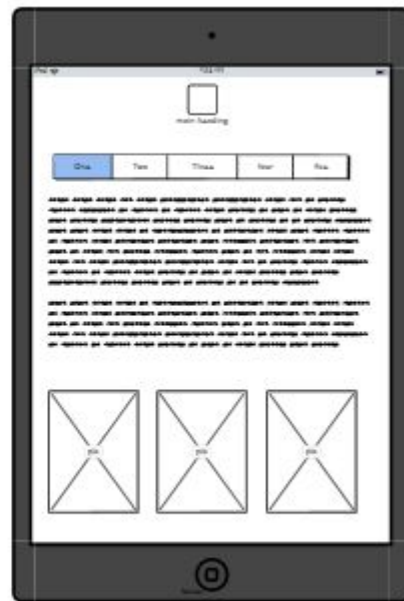

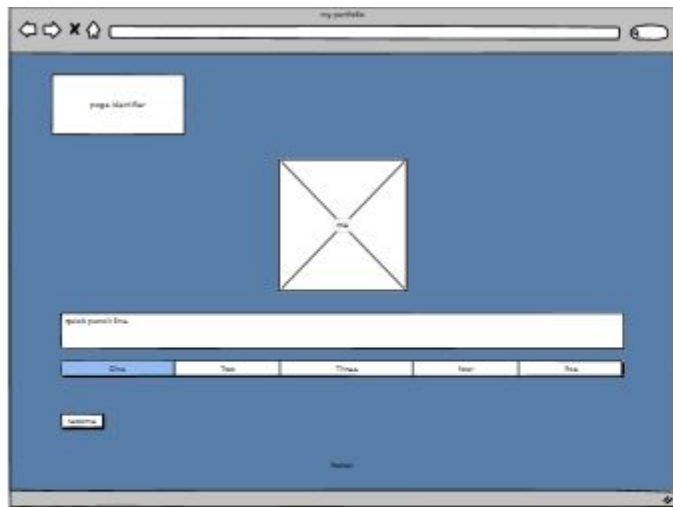

The presentation and associated Slide deck should include,

- *A walk-through of your portfolio website and its features*
- *A walk-through of your design process and decisions*
- *A review of your development/build process including challenges, ethical issues, favourite parts, etc*

SITE MAP

WIRE-FRAMES

Home Page

This is a picture of my mug down southbank area, i just centered it and set it to a % of the page

This is my welcome and quick punchline, these colours went well in my vision.

I created this extremely intricate heading online, hours of development in this piece

This little bit of info was to satisfy the html semantic requirements, but its also completely true. I am going to keep up dating this part as i learn more.

I decided to put the page nav bar down the bottom on this page so that i can have my header and photo as the first thing you see.

WORK

Im currently working full time as an Industrial Electrician in Coopers Plains. It can be very challenging at times, but i feel for me to progress forward i need to head into the digital field. I really enjoy working on programming as ive done a little bit of it in the industrial realm, with all the safety of machine guarding and doing simple programming on hydraulic systems that need a small bit of IO to achieve what is required. I also used to run my own business back in Melbourne for over 5 years. That was great and extremely rewarding with the amount of people i seen and met, but eventually the long hours and the fact I should of employed some help, i eventually burnt out and wanted to get out of the game. So thats when i switched up and thought time to get a good job as an industrial Electrician and work for some one and close the business. Ive attached some pictures of the jobs that we have done over the years.

Ive made this heading of the page to appear 40% of the total website on any advice, im not sure how well it will work in future with screen resolutions so big, but it works on mine.

This is a few pictures of the jobs ive done over the years, they are switchboards at sanitarium health foods, and for big mining lines at PGH, that motor you see is over a ,meter wide!

This is a paragraph about my work that i currently am doing, its an extremely quick rundown of over 3 years of work. A few pictures are attached, they are slightly blurry as i ran out of time to scale them and align them properly, but this website is my first, and you wait to see my last!

ABOUT

Heres a little about myself

- Im currently employed full time as an Industrial Electrician
- Been a qualified electrician for 10 years
- Moved up from Melbourne in 2018
- I used to run my own business for over 5 years
- I love to camping, fishing, anything near and on water
- Into the gym, bike riding, basically anything fitness!
- Massively into Biohacking
- Love inventing, I spend most of my days thinking of new inventions
- Love being outside as much as I can

This is the head for the page again., its set to 40% which is a good size for most devices. Possibly a little too big

Heres a little bit of text that is about myself. It's a quick run down of my hobbies and what makes me tick.
